

SOFTWARE TRAINING SERVICES

Oso Healthcare understands that RIS/PACS training requires more practical and hands-on training methods compared to traditional classroom instruction, which often provides limited practical application to a RIS/PACS user.

Oso Healthcare is pleased to offer eLearning sessions for ClearCanvas Workstation and onsite 'bootcamp' practical training for ClearCanvas RIS and Image Server. Our team has years of experience in RIS/PACS environments and our ClearCanvas Software Training services have been designed to provide users with practical, hands-on real life scenarios to help them start using ClearCanvas RIS/PACS software as quickly as possible.

Open Source • Patient Centric • Service Excellence

Product	ClearCanvas Image Server	ClearCanvas RIS	ClearCanvas Workstation
Description	A 3-day onsite 'bootcamp' training course to provide participants with a general overview and hands-on experience on how to setup, operate and troubleshoot the ClearCanvas Image Server software.
